

PLANT CLASSIFICATION

CHAPTER 1, LESSON 3

— [All plants make their own food

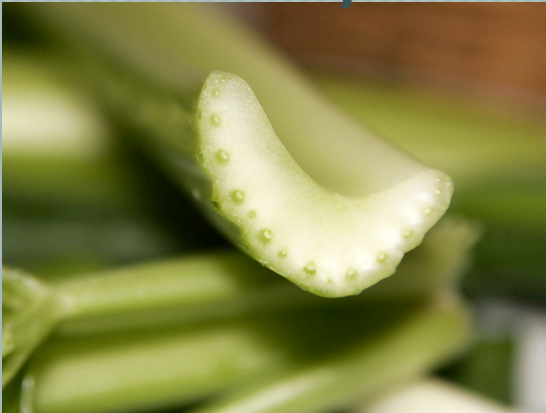

— [There are 2 main groups of plants...

VASCULAR PLANTS

- [have tubes that are found in their roots, stems, and leaves
- [the tubes carry water and nutrients to all parts of the plant

EXAMPLES OF VASCULAR PLANTS

Celery

Any plant that produces flowers or cones

Ferns

Giant Sequoia Trees

NONVASCULAR PLANTS

— [do not have tubes

— [water is soaked into the plants and passed slowly from cell to cell

— [must live in damp places

EXAMPLES OF NONVASCULAR

Moss

Hornworts

Liverworts
