Name

A 1-3 Study Guide Plant Classification

1. <u>Vascular</u> plants have tubes.

2. The job of the tubes is to carry <u>water</u> and

<u>nutrients</u> to all parts of the plant.

The tubes of	vascular		_ plants are found in their
roots		stems	, and
leaves	•		

- 4. <u>Nonvascular</u> plants do not have tubes.
- 5. <u>Nonvascular</u> plants would most likely live in damp places.
- 6. Plants without tubes pass water slowly from <u>cell</u> to <u>cell</u>.

7. Name 3 plants with tubes:	Name 2 plants without tubes:
ferns	moss
trees	liverwort
flower	

8. The main difference between plants and animals is that:

plants make their own food,

and <u>animals</u> do not.
