

Kindergarten Teaching Resources -- Week of April 27, 2020

Please remember these are NOT required activities. Don't feel pressured to do any of it. They are simply here to use as a tool for better understanding of a skill or to use as independent practice.

Any activities that are relevant to THIS week's lesson or new this week will be highlighted.

DISCLAIMER- some of the videos suggested below are YouTube videos. Please monitor the use of this platform.

Reading

Epic

Each child has an account for Epic. There is an array of books on this site/app that your child can read, have read to them, or watch. Please utilize this if you are unable to read with them. I can also assign on level books and "quizzes" to individual students if this is something you feel that your child would have time for.

<https://www.getepic.com/students>

Headsprout

This phonics based program meets each child exactly where they are. They can independently work through levels to improve upon their reading skills to earn rewards and see their progress. Another fantastic independent program that your child can do while building phonetic skills

<https://www.headsprout.com>

Teach Your Monster to Read

This game based reading program helps students master the beginning skills of reading and then progress through the fundamentals for learning to read those "tricky" words. If you access this program through a computer, it is free! :) Please see the correlating document for your child's username and password.

<https://www.teachyourmonstertoread.com/>

ABC Mouse

This site helps kids learn to read through phonics, and teaches lessons in math, social studies, art, music, and much more.

Code: SCHOOL6739

Comprehension- Main Idea

For your child's 15 minutes of daily reading, they can choose to read this [passage](#) and then test their comprehension by answering the follow up questions. Have your child challenge their brain by answering in a complete sentence.

Here are some additional [reading passages](#) with comprehension questions, as well as [these ones](#) that focus on the letter A.

Sight Words (HFW)

For each of our Sight Words this week, there is a fun little video the kiddos can watch to introduce it and hopefully make it stick. Please feel free to watch as many times as you would like.

look	https://www.youtube.com/watch?v=wjJbnMLpS-o
saw	https://www.youtube.com/watch?v=9bKCQLSc4VM
very	https://www.youtube.com/watch?v=FRiu7Is4mRk
put	https://drive.google.com/file/d/1vU2KijSa5HXsluAO8qdDcnQ5wd1OkkKo/view?usp=sharing
their	https://www.youtube.com/watch?v=tcXRmsCfV54
out	https://www.youtube.com/watch?v=OxliqYxXyJA

Your child can also practice the sight words with these [individual sight word pages](#). The more exposure your child has to each word, the more likely it is to stick.

Fundations

Sentences

In Fundations, we are learning about complete sentences. When writing a complete sentence we always have a capital at the beginning, spaces in between the words, punctuation (or thought stopper) at the end. Here is a little video about punctuation. It is quite a catchy tune!

<https://www.youtube.com/watch?v=9In5IUUCzAA>

Let's pretend we are detectives on a secret mission to solve this [Secret Sentence](#). Practice writing your sentence correctly as you try and "crack the code".

Remembering the very important sentence rules *starts with a capital* spaces in between your words* ends with a punctuation* see if you can be the teacher and correct [these sentences](#) that your students wrote. Did they do a good job and follow our rules?

Science/ Social Studies

Pebble Go

We LOVE this website!! This is just another resource that is available for them to “grow their brains”. It allows them to see past the walls that we are all currently stuck inside and explore the worlds of science and social studies.

Username: square Password: read	https://pebblego.com
---	---

National Geographic

This is a subscription that we have in the classroom and LOVE! You may have seen these come home in the past. Thankfully National Geographic gave us digital access! You can view April's edition and enjoy all that National Geographic has to offer from the comfort of your home!

Life Cycle- frog

For the next few weeks we will be studying the life cycles of many things you find in spring. This week we will be learning about frogs and the stages they go through in life. Just wait until you hear about their VERY interesting lives!

Monday	<ul style="list-style-type: none">→ Frog life cycle video→ Frog life cycle poster (cartoon)→ Frog life cycle poster (real)
Tuesday	<ul style="list-style-type: none">→ Wild Kratts Aquafrog→ <i>Frog Life Cycle</i> reader
Wednesday	<ul style="list-style-type: none">→ Label the frog parts→ Frog vocabulary match→ Describe a frog
Thursday	<ul style="list-style-type: none">→ Frog life cycle sequencing
Friday	<ul style="list-style-type: none">→ Frog research→ Frog-Tadpole venn diagram

Math

Below you will find links to a number of additional resources to help enhance your child's understanding of this week's skill.

[Daily Warm Up](#)- Just like Mrs. Keller's math warm up, fill in the missing number within the counting sequence.

[Missing Numbers](#)- Try filling in these missing numbers in the number grid and counting sequence.

[Extra Practice](#)- If you would like more practice with the same, 1 more, and 1 less, you can work on these worksheets.

[Lesson Homework](#)- This week's lesson comes with homework practice that you can also use to master the skills at home.

[Application Problem](#)- These application problems allow your child to apply this week's skill to real life scenarios that require higher level thinking.

[Quick Check](#)- If you would like to check your child's understanding of the math concepts this week, you can use this "Quick Check" as an academic check in. Let your child's teacher know how they did. We are always excited to celebrate with you!!

[Lesson Materials](#)

Here you find materials to make **Thursday's** lesson a little more hands on. Simply print out the shapes and follow the directions at the top of the first page.

[Happy Numbers](#)

This is just another resource that the kids can do independently (once you get them started) while still supporting them through a number of math skills that align with our Eureka math curriculum.

https://happynumbers.com/find_class

[Zearn](#)

This online math platform is a great resource for your child to review math skills as they were taught in the classroom. Zearn is a platform used by first and second grade to instruct students through Eureka math, as it aligns cohesively with our curriculum. As with our other online components, Zearn is presented to the students in a fun-filled, game manner that makes them want to learn.

Your child's teacher has each student's login information.
